Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Phillips in view of Fuller et al in view of Martin. Phillips disclose the basic claimed structure including a float tube cover 12 for use with an inflated resilient ring shaped tube 10, the cover designed to stretch around an exterior of the tube, the cover provided with an attaching lacing 18, and one or more pockets 56 for storing items for use while engaged in tubing on a body of water. Not disclosed by Phillips are attaching clasps and a hand leash. Fuller et al teach clasps 17. Martin teaches a hand leash 52. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the cover of Phillips to be attached with clasps as taught by Fuller et al for ease of use. Additionally, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Phillips with a hand leash which attaches to a clasp as taught by Martin for improved user safety.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wood shows a connector. Farmer shows a float. Evans shows a clasp for a cover.
